

## Recording a Video in Zoom for Students

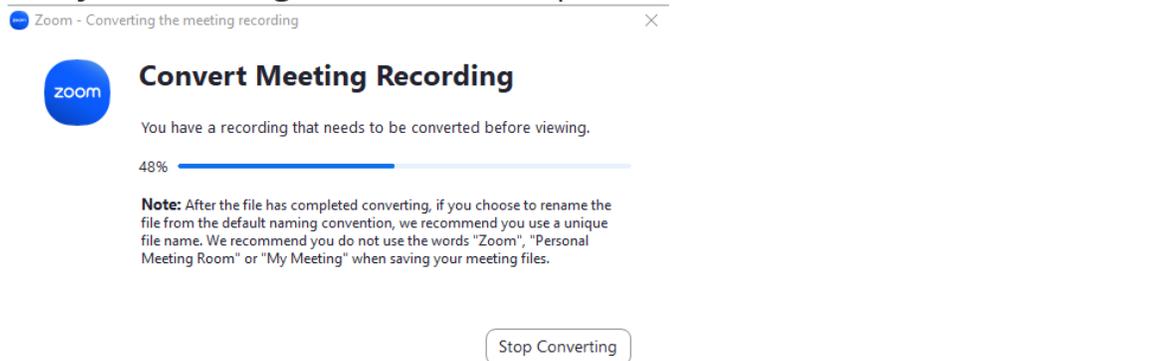

1. Start your meeting and click the Record icon to record on your computer. This option may be hidden under More if your Zoom window is small.

2. Click the Stop Recording icon when you are finished.

3. End your meeting for the video to process.

4. The folder containing your video should open. The .m4a file is an audio file and the .mp4 file is your video file.
